---

I am an Informatics Engineering student at Multimedia Nusantara University (UMN) with strong expertise in front-end programming and UI/UX design. I am proficient in HTML, CSS, JavaScript, and frameworks such as React, Tailwind CSS, and Laravel. My experience includes building dynamic and responsive websites, integrating APIs, developing web-based games, and creating scalable web applications. I have also utilized Tailwind CSS and React to create modern, responsive user interfaces, and Laravel to build robust back-end systems. Additionally, I have a solid foundation in designing user-friendly interfaces and workflows using Figma for prototyping and ensuring excellent user experiences. These academic and project-based experiences have honed my ability to solve real-world challenges with technical proficiency, creativity, and a strong attention to detail in web development and UI/UX design.

## EDUCATION

---

- Multimedia Nusantara University – Kabupaten Tangerang, Indonesia (2022 – Present)  
Undergraduate Student in Informatics - Current GPA: 3.0 /4.00
